**Subject:** NB Harbor Initiatives and EPA Support

Hello Dave,

I just wanted to pass on our appreciation of your support for several harbor development initiatives in New Bedford. We are particularly pleased with the momentum behind the state enhanced remedy program and dredging, CAD technology to expedite the superfund clean-up, relocation of the desanding facility and the EPA headquarters site, signage for harbor recreational fishing, and most recently your advocacy in the Boston Globe for the upper harbor crew course. All of these efforts are critical to both the environmental and economic health of New Bedford and we look forward to our continued partnership with the EPA to steer the course toward a revitalized waterfront. See you Thursday for the SER meeting.

Thank You and Best Regards,  
Kristin
